Fast Dispensing,
Easy to Clean
and Fill

The FIFO multi-purpose valve can dispense product ranging in viscosity from water to caramel, with particles up to 1/8 inch.

Whatever your dispensing needs, FIFO has a solution. 

Proper Food
Rotation

the sauce that was the first in is the first out

The FIFO bottle dispenses from the bottom through a non-drip silicone valve and fills from the top.

Simply squeeze the bottle to open the valve and dispense the product. Once you let go, the valve automatically closes. The bottom-dispensing design increases the speed of service and minimizes waste.
